

Have you had medical, dental or cosmetic treatments in Bangladesh, India and Pakistan?

If so, you could have been exposed to hepatitis C – a virus that can cause serious damage to your liver without you knowing.

Document number: UK-UNB-3757 | Date of preparation: June 2023.

Scan the QR code or search hepc.co.uk, then answer five short questions to find out if you or someone you care for should order a free blood test to check for hepatitis C.

The *Hep C, K17* campaign is developed and funded by Gilead Sciences Ltd.
